***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Davis (USP 5,119,830) or Davis (5,595,187).

Davis('830) teaches an analytical specimen cup(10) comprising a base container(12) and a lid(14). The lid supports test strip pads(54) and precalibrated markings(68) to interpret the colorimetric changes of the pads(54). The claimed "toxicology indicator cap" has been read on the taught lid(14). The claimed "reagent strips" have been read on the taught test strips(54). Claim 2 is directed to the method of intended use of the apparatus and is of no patentable moment with respect to the pending apparatus claims.

Davis('187) teaches an analytical cup system(10) comprising a cup(12), a lid(14), test strips(30) mounted on the lid(14) and color comparison blocks(70a). The lid(14) is sealed to the cup(12) and the test strips(30) react with the sample. The color comparison blocks(70a) are used to interpret the results. The claimed "toxicology indicator cap" has been read on the taught lid(14). The claimed "reagent strips" have been read on the taught test strips(30). Claim 2 is directed to the method of intended

use of the apparatus and is of no patentable moment with respect to the pending apparatus claims.
